What we did during the Summer of 2009..when we became famous

People Lifter

People Lifter : This is a general but popular product. Here we are making a people lifter for Tod so he can lift his new baby on to his wheel chair. The Teddy Bear is a proxy for his baby !!

Thai is showing how to suspend the flat board that will become the base. Others in the photo are Perry Brown and Krishna .

We meet at Isle 1 at the OSH Hardware store - so we can get what we want right away.

People Lifter : Here Perry, Luan and Krishna are listening to Tod explain what he needs. It is really nice of OSH to let us meet there in aslile 1. There is a large well lit table where we can stand and work. Everything you want is tere..including free parking and rest rooms !!

What a great place to meet !

What we did during the Summer of 2009..when we became famous

What we did during the Summer of 2009..when we became famous

We are looking for things at OSH : Tod likes to design things right there at the store. So here we are cruising the isles of the hardware store looking for things.

The baby needs to be held by a pulley system attached to the back of the wheel chair...and that is the problem we are trying to solve here.

Conclusion:

We will continue to meet and make products for Todd. Up to now we have made for him a baby cariage holder, a crib holder, a play tray where the baby can lie back and play. We have not seen the baby use this ...but it is according to Todd's design. We gave him our inputs to make it safer, stronger etc. That is what Project enable is all about.
